

External-endpoint-concordant withholding in an immune-all-dropout setting

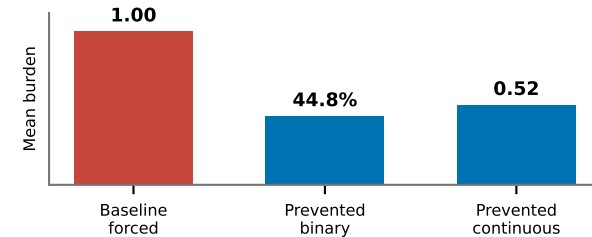

A Immune-all-dropout biological application design

B Withheld output is endpoint-concordant

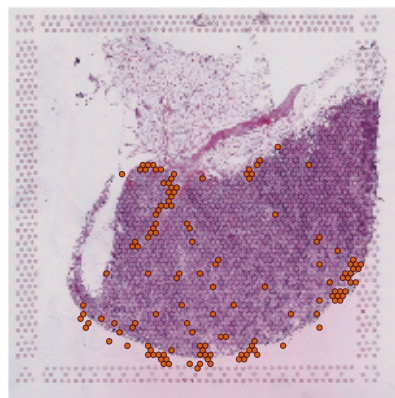

C SVTuner reduces forced non-immune burden

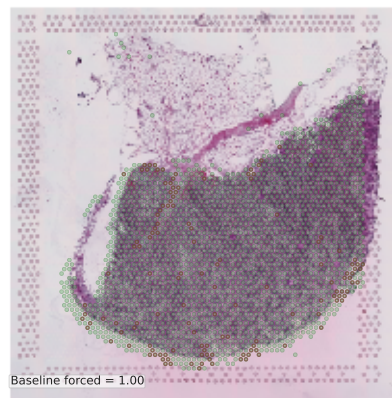

D Whole-section spatial concordance with the CTA Immune endpoint

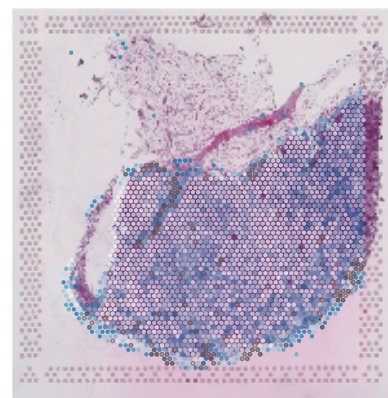

CTA Immune endpoint

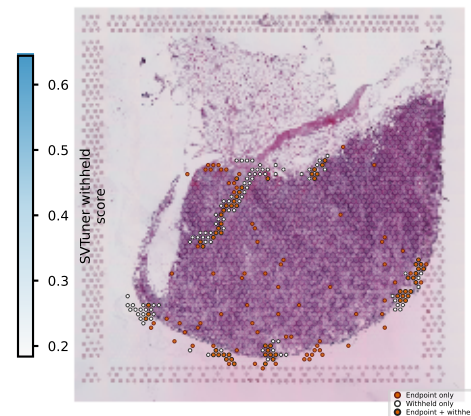

Baseline forced-call footprint

SVTuner withheld score

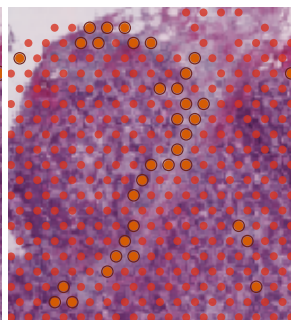

Endpoint + withheld overlap

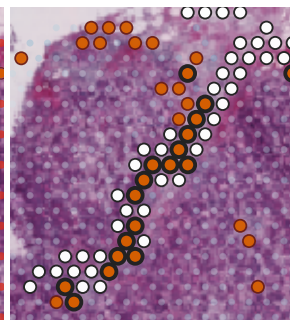

E Local field of view 1

CTA endpoint

Baseline burden

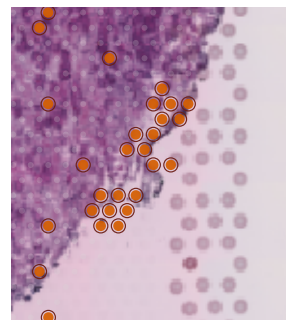

Withheld calls

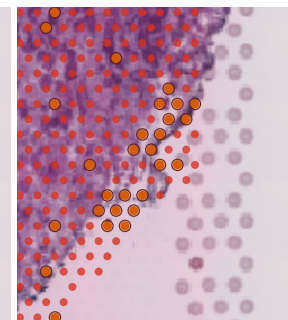

F Local field of view 2

CTA endpoint

Baseline burden

Withheld calls
